LEE LIK JOU

Senior Frontend / Full-Stack Engineer

Kuala Lumpur, Malaysia | +60123186099 | likjou@gmail.com
https://www.linkedin.com/in/likjou-lee | https://github.com/likjou

SUMMARY

Senior Frontend / Full-Stack Engineer with 3 years of experience building fintech web and H5 applications and multi-tenant platforms using Vue.js, Nuxt.js, React, Next.js, and TypeScript. Holds a First Class Honours degree in Cybersecurity. Based in Kuala Lumpur and open to remote roles with Singapore fintech and Web3 companies, with a strong interest in DeFi.

PROFESSIONAL EXPERIENCE

Frontend Developer | Hytech **2025 – 2026**

- **Fintech Feature Delivery:** Built and shipped core features for high-traffic fintech web and H5 applications serving 5 million users using Vue.js and React.
- **Performance Engineering:** Reduced page load times by 20% and payload size by 25% by engineering client-side caching layers and eliminating redundant API requests.
- **Architecture & Governance:** Maintained a multi-client enterprise monorepo, establishing reusable UI component patterns and enforcing code-quality standards across production repositories.
- **Design System Execution:** Implemented pixel-accurate interfaces from strict Figma specifications, balancing render performance with seamless UX.

Senior Software Engineer | Arrayhubs **2023 – 2025**

- **Multi-tenant Architecture:** Designed and deployed a unified multi-tenant system that consolidated fragmented repositories into a single codebase.
- **Legacy Modernization:** Partnered with a senior engineer to migrate a legacy PHP codebase to a modern Vue.js / Nuxt.js frontend, cutting response times by 50% through caching and lazy loading.
- **Technical Leadership:** Mentored a junior engineer in building internal operations tools, including automated receipt collection and monthly claims calculation apps (Nuxt.js frontend, Python backend services).
- **Data Visualization:** Built interactive executive analytics dashboards, consolidating multi-source data feeds into a single unified management view.

PROJECTS

Crypto Desk (personal project) — github.com/likjou/crypto-desk | crypto-desk-iota.vercel.app

- Built a Next.js and TypeScript crypto dashboard showing the top 50 coins, with live prices and 24h change streamed over Binance WebSocket feeds, with automatic reconnect and fallback endpoints.
- Integrated MetaMask via ethers.js on the Sepolia testnet: network switching, wallet balance, and a transaction tracker from signing to on-chain confirmation, plus recent transaction history.

AI Media Generation Platform (personal project)

- Built a full-stack app that combined several AI providers (OpenAI, Gemini, Flux, Seedance) behind a single backend for text, image and video generation with Next.js and Supabase.
- Handled long-running generation jobs with asynchronous status polling between the frontend and backend, so results showed up in the interface as soon as they finished.

EDUCATION

Bachelor's Degree in Cybersecurity, First Class Honours (GPA 3.7 / 4.0) **2018 – 2022**
Asia Pacific University (APU), Kuala Lumpur

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Vue.js, Nuxt.js, HTML, CSS
Mobile: React Native, Expo
Backend: PHP, Laravel, Python
Databases: PostgreSQL, MySQL, Supabase
Web3: ethers.js, WebSockets, MetaMask
DevOps & Infrastructure: Docker, Docker Compose, container networking, Nginx, reverse proxy, Cloudflare, DNS
Tools & Platforms: Git, CLI, Figma, Linux, macOS, Windows, phpMyAdmin
