SUMMARY

3 years building fintech web and H5 applications and multi-tenant platforms with Vue.js, Nuxt.js, React, Next.js, and TypeScript. First Class Honours in Cybersecurity.

EXPERIENCE

Frontend Developer, Hytech · 2025–2026

- Core features for high-traffic fintech web and H5 apps serving 5 million users (Vue.js, React).
- Cut page load 20% and payload 25% via client-side caching and removing redundant API requests.
- Maintained a multi-client enterprise monorepo, set reusable UI component patterns and code-quality standards.
- Pixel-accurate interfaces from strict Figma specs.

Senior Software Engineer, Arrayhubs · 2023–2025

- Designed and deployed a multi-tenant system consolidating fragmented repos into one codebase.
- Partnered with a senior engineer to migrate a legacy PHP codebase to Vue.js and Nuxt.js, cutting response times 50% via caching and lazy loading.
- Mentored a junior engineer building internal ops tools for automated receipt collection and monthly claims calculation (Nuxt.js frontend, Python backend).
- Built executive analytics dashboards consolidating multi-source data.

PROJECTS

MyHabitPro (HabitPro)

Personal mobile app · habitpro.cc

Habit tracker with tile-based grid charts that show progress by color intensity. Multi-repetition and incremental habits, streaks, and custom reminder notifications. Dark and light themes, an interactive calendar for past completions, and a home-screen widget for quick completion. Import and export of data. Privacy-first on-device storage, with no accounts or tracking.

Crypto Desk

Next.js + TypeScript · github.com/likjou/crypto-desk · crypto-desk-iota.vercel.app

Dashboard of the top 50 coins with live prices and 24h change via Binance WebSocket, with auto reconnect and fallback endpoints. MetaMask via ethers.js on the Sepolia testnet: network switching, wallet balance, a transaction tracker from signing to on-chain confirmation, and recent transaction history.

AI Media Generation Platform

Personal project · Next.js + Supabase · no public link

Full-stack Next.js and Supabase app combining OpenAI, Gemini, Flux, and Seedance behind one backend for text, image, and video generation, with async status polling for long-running jobs.

EDUCATION

Bachelor's in Cybersecurity, First Class Honours, GPA 3.7/4.0

Asia Pacific University (APU), Kuala Lumpur · 2018–2022

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Vue.js, Nuxt.js, HTML, CSS
Mobile: React Native, Expo
Backend: PHP, Laravel, Python
Databases: PostgreSQL, MySQL, Supabase
Web3: ethers.js, WebSockets, MetaMask
DevOps: Docker, Docker Compose, Nginx, reverse proxy, Cloudflare, DNS, Linux
Tools: Git, CLI, Figma, phpMyAdmin
AI tools: Claude, Claude Code, Cursor, ChatGPT, Grok, ElevenLabs. LLM integration with system prompts and guardrails.
